Professional Summary

Dedicated and passionate Angular Developer with nearly 4 years of hands-on experience crafting scalable, high-performance web applications. Expert in building dynamic, responsive user interfaces using Angular, TypeScript, RxJS, HTML5, Tailwind CSS, and Angular Material. Proven ability to collaborate with cross-functional teams, mentor juniors, and deliver maintainable solutions that drive business impact.

Seeking a senior or lead Angular/Front-End role in an innovative organization to contribute to cutting-edge projects, guide team growth, and advance toward full-stack expertise.

Education

BS in Information Technology 2017 – 2021
Minhaj University Lahore, Pakistan

- CGPA: 2.97/4.00
- Field of Study: Information and Communication Technologies
- **Final Year Project:** *Join Hands to Serve Society* – A donor-connect platform built with AngularJS, HTML, CSS, and Laravel for facilitating aid in money, blood donation, and essentials.

Government High School No.2, Piplan

- Marks: 728/1100

Professional Experience

Angular Developer 2024 – Present
Codexia Technologies, Lahore, Pakistan

- Led architecture and development of complex, scalable Angular applications, ensuring long-term maintainability and performance.
- Mentored junior developers on Angular best practices, code quality, and modern front-end patterns.
- Collaborated closely with backend teams for seamless API integration and system optimization.
- Conducted code reviews, optimized performance, and managed Git workflows, CI/CD pipelines, and deployments.

Front-End Developer 2020 – 2024
Beyond Logics, Lahore, Pakistan

- Built robust, responsive Angular applications using TypeScript, HTML5, Tailwind CSS, Angular Material, and CSS3.

- Leveraged RxJS for efficient state management and asynchronous data handling.
- Integrated RESTful APIs and contributed to full lifecycle development of user-centric features.
